Erratum

Genetic Relationship Between First-Lactation Body Energy and Later-Life Udder Health in Dairy Cattle

G. Banos, M. P. Coffey, E. Wall, and S. Brotherstone

J. Dairy Sci. 89:2222–2232.

There were typographical errors in 2 formulae presented in the manuscript on page 2231 (Appendix). The correct formulae were used in all data analyses. The authors regret the error. The corrected formulae are shown below:

Correct formula for the calculation of body protein weight:

$$\text{Body protein weight (kg)} = [0.200886 - (0.0066762 \times \text{BCS})] \times (\text{empty BW})$$

Correct formula for the prediction of daily energy content:

$$\text{EC (MJ)} = \{[9.4 \times (\text{body lipid weight})] + [5.7 \times (\text{body protein weight})]\} \times 4.1868$$
